

The Exhibition Site of Expo 2015 at Fiera Milano is located just a few km from the center of Milan. Expo 2015 takes place in a fully infrastructured area, thanks to the direct connection with the three city airports and the main public transport systems. It is really easy to get to the Site at the local, regional and international levels thanks to a very rich and integrated structural system:

- **The underground - Line 1** which connects the area to the urban public transport system by Molino Dorino park and ride and the parking area in construction in the Fair area.
- **Three motorway routes:** A4 Turin-Milan-Venice, A8/A9 Milan-Como-Chiasso and Milan-Varese and Western Bypass, which continues to the south with the A1 Milan-Rome-Naples.
- **The creation of access routes** into the exhibition center complements this infrastructures, releasing local traffic from that in transit and directed to the Fair.
- **The high-speed rail** link will have, at the western entrance of the Exhibition Site, a new dedicated station that will supply two regional railways lines, connected to the underground network of Milan. TRENITALIA is the Official Global Rail Carrier of Expo 2015.
- **The geographical location**, , that is equidistant from the airports of Linate, Malpensa and Orio al Serio, allows easy access to Milan airport system. ALITALIA is the official carrier of Expo 2015.
